Rebling Datasheet: 750 amp XFT-style Lithium Battery Terminal

Our 750 amp XFT-style terminal has performance characteristics identical to our BFT-style 750 amp terminal but is specially designed for mounting onto thin or weak panels. The XFTstyle 750 amp terminal's nickel-plated brass core stays cool at 750 amps of continuous current or short term peaks of 4.000 amps. These terminals are designed for the temperature sensitive environment of lithium battery cells, the charging rates of ultracapacitors and supercapacitors or installation in power distribution units. Equipping your power module with these watertight, single pole, wrench disconnect brass terminals will facilitate the incorporation of your modules into cutting edge GenSet, APU or Vehicle Electrification systems. Whether you are designing a liquid-cooled, pressurized battery pack for EV Mobility, a hazardous environment Generator Set or are simply bringing high current through a panel of any thickness, our XFT-style 750 amp terminals, Covers and Accessories were designed with your application in mind.

Mounting and Assembly

Minimum Panel Thickness 0.025" (0.64 mm)

Mounting Hole Pattern (see diagram below) Three Circular Holes

Torque on M10 Bolts:

Recommended 60 to 80 in-lbs (6.8-9.1 Nm) electrical performance does not get better or worse above 60 in-lbs (6.8 Nm) a Grade 4, M10 stainless bolt will snap at 490 in-lbs (55 Nm)

Torque on M5 panel mount screws:

Recommended 10 to 15 in-lbs (1.1 - 1.7 Nm) mechanical performance does not improve above 10 in-lbs (1.1 Nm) Maximum Recommended 22 in-lbs (2.5 Nm) the terminal's mounting ear will begin to deform at 36 in-lbs (4.0 Nm)

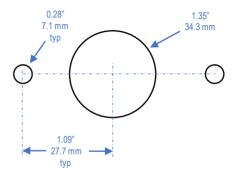

Application Notes

- 1. <u>Watertight is superior to IP68</u>: Rebling terminals are completely watertight to a depth of 20 meters which is superior to any IP Rating. The definitions of IP67, IP68 and IP69k per IEC 60529 state that "water may penetrate the seal but shall do no harm", a condition that is unacceptable to lithium battery designers.
- 2. Cable Pulling Lubricant: when using 4/0 (110 mm²) cable with the flexible cover, crimp the lug to the cable then push the lug into the cover using lubricant
- 3. Panel Mounting Hardware: to achieve watertight sealing, the McMaster Carr P/Ns shown below can be used

92855A516 M5 stainless socket head screw

91828A241 M5 stainless nut 9452K16 M5 O-Ring

Mounting Hole Pattern
